=====
```

- o Create bootable USB drive:
 - + On current "Ubuntu" system:
 - __ List all disks, please notice "disk" and size to get device name, eg. 'sdb'
 - > lsblk
 - * If the USB drive is automatically mounted, unmount it before proceeding:
 - > sudo umount /dev/sdb1
 - __ Write the .iso file to the USB drive using "dd":
 - > sudo dd if=/path/to/ubuntu.iso of=/dev/sdb bs=4M
 - status=progress
 - __ After "dd" command completes, synchronize data to ensure all changes are written to USB drive and then safely eject it.
 - > sync
 - > sudo eject /dev/sdb

[*] Plug USB drive containing Ubuntu Desktop 24.04.3-LTS installer (flashed from .iso file)

- o On "Boot" screen
 - + Select "Try or Install Ubuntu"
- o On "Welcome to Ubuntu" screen
 - + Click on top right icon, disable "Wi-Fi", "Airplane Mode", "Bluetooth"

```
